EDUCATION

California Polytechnic State University, San Luis Obispo

Bachelor of Science Degree in Computer Science

March 2025

EXPERIENCE

Software Engineer, Renov8ai

February 2026 – Present

- Architected and built a native iOS application using React Native, Expo, and Expo Router, transforming web workflows into a user-friendly mobile experience deployed via TestFlight.
- Engineered an AI-powered assistant that leveraged user context, application data, and conversation history to deliver personalized responses, perform in-app actions, and navigate users to relevant workflows.
- Implemented Web Sockets and a bi-directional event-driven architecture to synchronize database mutations, message threads, @mentions, and notifications in real time between web and mobile clients.
- Migrated image generation from OpenAI DALL·E to Google Gemini, optimizing performance and implementing prompt guardrails to improve output quality and consistency.
- Designed responsive mobile screens that eliminated critical layout bugs, ensuring on-screen keyboards never blocked text inputs and chat elements automatically adjusted to prevent content clipping.
- Debugged and resolved production issues, conducted QA testing, and developed automated test coverage.
- Actively participated in technical and business discussions, collaborating with stakeholders and the development team throughout the software development lifecycle.

Autonomous Vehicle Software Operator, Zoox

June 2025 – February 2026

- Perform comprehensive tests on diverse routes and missions to ensure the safety, reliability, and performance of autonomous vehicle systems.
- Support the development of new autonomous vehicle software systems by collecting and analyzing real world operational data.
- Monitor vehicle performance, diagnose issues promptly, and communicate detailed findings to the dispatch and engineering teams.

TECHNICAL PROJECTS

Showroom Booking App

January 2026 – February 2026

- Built a full-stack appointment scheduling platform using Next.js, TypeScript, Prisma, and PostgreSQL
- Engineered real-time scheduling logic that prevented double bookings and maintained accurate availability across booking workflows.
- Integrated Clerk for secure user authentication and account management, enabling protected routes.
- Designed an admin dashboard with role-based access control for managing appointments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++

Frontend: React.js, React Native, Next.js, Expo, Expo Router, Tailwind CSS

Backend & APIs: Node.js, Express.js, Prisma ORM, Web Sockets, Axios

Databases & Infrastructure: PostgreSQL, Supabase, MongoDB, AWS, Azure, Docker, GitHub, Render, Linux
